Ans

Education plays a vital role in encouraging development of universal human values in individuals & society. The process of value education should be a self-exploration process, rather than being prescriptive. It should focus on helping individuals understand human aspirations, discover what is truly valuable in life and develop a sense of harmony within themselves, their family, society & nature.

The content of value education should be universal, rational, nature, verifiable, and leading to harmony. It should aim to develop the right understanding, relationships and physical facilities in individuals, in that order of priority. This in turn will lead to holistic development, which is the transformation from animal consciousness to human consciousness.

Education - sanskar has a significant role to play in this transformation. It should facilitate holistic development by ensuring right understanding, the capacity to live in relationships with others, and

the capacity to identify need for physical facilities, leading to a feeling of prosperity.

Ultimately, the goal of education should be to develop human consciousness, which is living with continuous happiness & prosperity by ensuring right understanding, fulfillment in relationship and physical facilities in the correct priority.
